IV CHART CORRECTIONS

This section contains corrections to federal and private maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. The mariner must decide which Chart(s) to correct. The following example explains the individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date to Mariners	Last Local Notice Datum Reference	Horizontal Correction	Source of Notice to Mariners	Current Local
↓	↓	↓ ↓	↓	↓ ↓

↑	↑ ↑					
Corrective Action	Object of corrective Action			Position (Degrees, minutes, seconds and tenths)		

The letter (M) immediately following the chart number indicates that the correction should be applied to the Metric side of the chart only. (Temp) Indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM).
